

Points to Remember

Points to Remember

Defining Projects

Consider the full range of solutions

Infrastructure can sort multiple problems

Good organisation will improve CBA for infrastructure

Understanding the Problem

Use all resources

- Data
- Consultation
- Reports/Forecasts
- Observations

Describe the problem well, and measure it

Be specific with objectives

But be flexible

Evaluating Projects

Measure where possible

Consider cross-impacts

Review at strategy level

Combining Measures into a Plan

Understand where measures support each other, or compete with each other

Ultimate goal is to find optimum combination of measures

Considering Risk

Is strategy built on one large project?

Sufficient consultation?

Are all risks understood?

Thank you for your attention
